

Genuine Printronix Supplies

Protecting Your Printer Investment

L5000 Series Laser Printer Supplies

Printronix LaserLine printer systems require supplies that meet exacting specifications and full operational requirements. With your printer in mind, LaserLine and all Genuine Printronix supplies are designed and manufactured to provide maximum print quality and cost effective operation, resulting in high reliability, repeatable quality and reduced cost of operation.

Genuine Printronix LaserLine Supplies

Printronix LaserLine L5000 Series laser printers are specifically built for high-speed printing in industrial distribution centers, service bureaus and ERP environments. And since they handle a wide range of media... paper, pressure-sensitive labels, synthetics, plastic cards, batch reports, bar code labels and fanfold forms... they require an imaging system that repeatedly prints durable print images. Called Flash Fusion, this fusing system eliminates heat and pressure, resulting in outstanding print quality.

However, print quality of this Flash Fusion system is only as good as the supplies used within the printer. That is why Printronix invests heavily in the research, development and testing of all LaserLine supplies. Printronix ensures that the supplies below meet the full operational requirements of LaserLine printers.

- Toner
- Photoreceptor Drum
- Developer
- Developer Unit

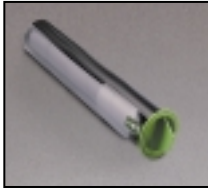

The Printronix Guarantee

Genuine Printronix LaserLine Supplies are unconditionally guaranteed to meet and exceed the requirements of your most demanding applications.

PRINTRONIX®

L5000 Series Laser Printer Supplies
